TAKE THE RUNNING OF YOUR SCHOOL TO THE NEXT LEVEL

Our innovative technology consists of a fully integrated cloud-based school administration, curriculum, finance, and communication system. These two products support our more than 2,500 schools throughout the region.

The d6 Application was developed primarily to address communications shortcomings and now enable both integrations with the entire d6+ product suite (admin, curriculum, finance and communication) and also allow schools to create private channels with more controlled access to the information they communicate.

1
